The Joint Committee has continually been looking at the best ways to remedy the major problems we have experienced at the North Tower pool over many years. The following is the results of our endeavors as of this writing.

**PROBLEM:**
Inappropriate guests

People from all over North Myrtle Beach and beyond have accessed this pool in the past.

**SOLUTION:**
We have installed a 6-foot fence around the entire pool that will require a Ponderosa issued access card for admittance. Residents with current cards are automatically programmed for access. You will need to do nothing.

Renters in the Tower, Villas and Marina will receive their own access cards.

**PROBLEM:**
Parking

**SOLUTION:**
When the North Tower installed the fence around their parking lot, BRRA residents were forced to park in The Boathouse parking area or wherever they could find.

Looking at the picture below, we plan on making the green line maintenance road more passable and cut the grass in the enclosed red area. The red area shown is only a rough sketch and needs to be better defined.

A shuttle stop will be added in the area of the little purple circle shown in the upper right.

UPDATE: the North Tower pool

Continued
North Tower Pool Update, continued

**PROBLEM:**
Glass in the pool

**SOLUTION:**
We have added a multitude of video cameras that provide coverage of the entire North Tower and the swimming area. These are high resolution cameras that will provide excellent night coverage and data will be stored for roughly a week on each camera before being over-written. The amount of storage will allow us to keep images even longer, should we decide it is necessary.

If anyone were to break glass in the pool, we can zoom in to the exact balcony it was thrown from or examine the pool area for someone breaking glass on the deck. Any reported infractions to Ponderosa or the security guards can be witnessed on the videos. All this data is time stamped.

The Joint Committee intends to prosecute all identified guilty parties to the fullest extent of the law.

Glass containers of ANY type will not be allowed inside the pool fencing. This rule will be strictly enforced – NO EXCEPTIONS.

**PROBLEM:**
Floats in the pool

**SOLUTION:**
We had to make the decision to NOT ALLOW any large floats in the pool. They obstruct the view of any potential problem that may occur in the pool and they are simply too big when the pool is crowded. Floaties and other swimming assist safety devices will continue to be allowed.

**Restrooms**
The restrooms have been thoroughly and completely cleaned, the interiors have been repaired and re-painted, and new exterior doors have been installed.

**Smoking**
Smoking will only be allowed in a designated smoking area near the restrooms. This rule will be strictly enforced.

We on the Joint Committee always welcome questions, comments or suggestions.
